

BODHA VENTURES

The Personal Finance Program

Program Guide

This course is not for people who want to gamble with their money. If you're looking for hot tips, overnight returns or the next "100x stock" — this isn't the place. The Personal Finance Program is built for people who want to build real, lasting wealth: patiently, intelligently, and on solid foundations.

01 THE JOURNEY

From Absolute Beginner to Knowledgeable Investor

No finance background needed. Students move step by step through simplified, structured financial education designed to stick — and to work in real life.

01 Money 101 · 8 chapters

Understand how money actually works — its origins, its role in the economy, and how it flows through personal life.

02 Budgeting 101 · 17 chapters

Build a strong financial foundation by managing income and expenses to consistently generate surplus for saving and investing.

03 Introduction to the Stock Market · 8 chapters

How financial markets function, how stocks are traded, and how investors participate in business growth through equity ownership.

04 Introduction to Mutual Funds · 15 chapters

How mutual funds work, the types available, and how SIPs let investors build diversified, professionally managed portfolios.

05 Choosing the Right Mutual Funds · 17 chapters

A step-by-step framework — goals, risk metrics, costs and portfolio quality — for selecting the right funds among thousands of options.

06 Fundamental Analysis · 25 chapters

Evaluating a business through financial statements, profitability, growth indicators and valuation, to find high-quality long-term investments.

07 Technical Analysis · 18 chapters

Reading charts, trends, candlesticks, support & resistance, volume and indicators to improve investment timing and decisions.

08 Portfolio Construction & Wealth Strategy · 12 chapters

Structuring a portfolio based on risk tolerance and goals, with asset allocation, diversification and disciplined position sizing.

09 Taxation for Investors · 9 chapters

How the Indian tax system applies to capital gains, dividends and interest income, and how to plan tax-efficiently.

10 Getting Started: Your First Investment Plan · 10 chapters

Opening accounts, building a first portfolio, creating a monthly investing plan, and a roadmap for the first year as an investor.

02 BEYOND THE CURRICULUM

Learning That Continues After the Module Ends

The program isn't a one-off syllabus — students stay supported and engaged well after they finish a module.

Resource	What It Offers
WhatsApp Community	A live space for students to ask doubts and stay engaged with the material.
The Sensible Investor (Podcast)	Breaks down markets and money in plain language, available on Spotify.
Free Weekly Blogs	Deep dives on markets, policy, and personal finance, published every week.
